SUMMARY

Data Analytics trainee and BCA graduate (2026, CGPA 8.2) who builds analyses in Python, SQL and Power BI and explains the findings in plain business language. A curious generalist who looks for relationships across topics and tests them with data. Seeking an entry-level Data Analyst or Business Analyst role.

SKILLS

- **Programming and querying:** Python (Pandas, NumPy), SQL (joins, CTEs, window functions), Streamlit
- **Business intelligence:** Power BI (DAX, dashboards, drill-through), Excel
- **Analysis:** Exploratory data analysis, descriptive statistics, web scraping

PROJECTS

- **Used Car Market Analysis (Cars24)** - Web scraping and EDA on used-car listings across 4 brands and 4 cities using Python, BeautifulSoup, Pandas and Regex. Analysed pricing by brand, city, age, fuel type and transmission and answered 8 business questions.
- **Global Retail Sales Dashboard** - Power BI dashboard on the Global Superstore dataset covering sales, profit, customer segments, regions and top-selling products.
- **Music Store Management (Chinook database)** - SQL analysis of customer purchasing behaviour, sales performance and music preferences.
- **Telco Customer Churn Analysis (in progress)** - Exploratory analysis of the IBM telco churn dataset in Google Colab, covering missing-value handling and outlier detection.

EDUCATION AND TRAINING

- **Bachelor of Computer Applications (BCA)** - Elite Degree College, Dubacherla, Andhra Pradesh. 2026. CGPA 8.2.
- **Data Analytics training** - Innomatics Research Labs, Hyderabad. Completed.
